Hey John,

Here are my initial notes.

You should run the site through a validator. https://validator.w3.org/nu/?doc=http%3A%2F%2Fcreativecs.azurewebsites.net%2F   You can see here that there are some common errors.

The admin / password protected pages aren't actually protected. If you aren't logged in, but know the address, you can view the content.

Viewing on a Desktop, index page lists inside your content blocks should be left aligned, but the ul itself is centered.

I'll have some additional notes when I have another window of time to review.

Subject: LCC Capstone Mentor Group

Hello Charles,

This is John Bell from the LCC Capstone Group you are mentoring. Sorry for switching contacts on you, I know Yadira had spoke to you previously.

I wanted to follow up with you to thank you again for agreeing to be our mentor, and to let you know that the project so far has gone very smoothly and we've made a lot of progress in the short time.

If you remember from our presentation, we had initially created a design documentation for Belknap Hot Springs Lodge. It turned out however that our contact for Belknap was not actually authorized to make the decision and that the ownership of the resort had already been in contact with another company prior and a new website was already in progress.

Because of this, we ended up with a new client: Creative Cyber

Solutions. Creative Cyber Solutions is a local web and software development company. We have used the content and requirements they provided with us to create an Alpha Release of our project.

The Alpha Release has been deployed and can be found here: http://creativecs.azurewebsites.net

There is a red box on the top with a link to our testing instructions and feedback form, you are welcome to use it or if you would prefer to just give us some general feedback via email or personal meeting that is also welcome.

If you would like to see our code, you are also welcome to view our repository here: https://github.com/insidmal/CCS-Capstone

We greatly appreciate your time and helping us with this project and look forward to hearing your feedback.

Thank you,

        John Bell
